Vitest

- Vitest is a JavaScript testing library.

- Use the **describe** function to organize your tests into categories.

- Use the **it** function to declare the logic you're testing.

- Use the **expect** function to write an assertion.

TDD and Testing

- In **test-driven development (TDD)**, we write our tests first.

- We're primarily going to be writing **unit tests**. A unit is a small, independent piece of our program.

- The Testing Pyramid recommends that unit tests > integration tests > E2E tests
